

Christmas Greetings

PERFECT SOLUTIONS

By Lars Skou, CEO in R2 Agro

The year of 2016 is running out and another busy but good year has passed.

I would like to take this opportunity once more to thank both our customers, suppliers, and other collaboration partners for a unique collaboration.

In 2016 R2 Agro has expanded our grain storage facilities to be able to meet the demands for our products.

At the same time we have expanded our production facilities for our supplementary feed and established a test kitchen where our development continuously is working on developing new products. Only in 2016 we have introduced the following products:

[EnergyCal](#)

[ReviLyt](#)

[ProtectOx](#)

[SpeiZi](#)

[Sow FiberLac](#)

We have continued our work with CSR as it is obvious to anybody that ethics around people and environment is becoming a more and more important factor for the future world.

I am convinced, that CSR will also be the focus of attention when it comes to the collaboration of the future and that it also in the long view will bring financial gain.

I wish you a merry Christmas and a happy and prosperous New Year.

Lars Skou
