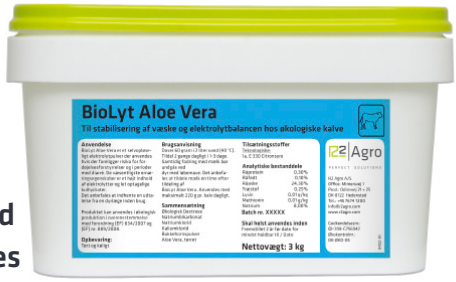
BioLyt®Aloe Vera

Effervescent electrolytes with aloe vera



BioLyt Aloe Vera is an effervescent concentrated electrolyte product for dilution in water. The product is used in case of risk of, during periods of, or recovery from digestive disturbance (diarrhoea). BioLyt Aloe Vera contains the important electrolyte salts Na+, K+, and Cl-, and is composed based on the American SID concept (Strong Ion Difference), which ensures a correct mutual relationship between the electrolyte salts.
BioLyt Aloe Vera is developed concerning quick and efficient rehydration.

BioLyt Aloe Vera can be used in organic production in accordance with regulation (EF) 834/2007 and (EF) no. 889/2008.

BioLyt Aloe Vera contains:

- High content of electrolytes in mutual adjusted factor
- Dextrose as easily absorable energy
- Aloe Vera and fenugreek seeds
- Alkaline buffer in form of Na+ og K+

Content	Recommend. mmol/L	BioLyt Aloe Vera mmol/L
Na^+	70-145	105
K^+	20-30	20
Cl^-	50-100	60
SID	60-80	64

Packaging:

3 kg bucket - 120 buckets per pallet

Benefits and effect:

- Adds an optimum supplement of vital electrolytes
- Re-establishes quickly salt- and fluid balance
- Tastes good and provides ekstra energy
- Stabilizes a normal intestinal function and a firm faecal consistency
- Stabilizes the acid-base balance in the blood
- Supports the calf's natural resistence
- Easy to administer – effervescent in 40°C warm water

Application:

Mix 60 grams of BioLyt Aloe Vera in 2 litres of lukewarm water (35-40°) and administer to the calf twice a day for 1-3 days. It is recommended that the milk feeding continues when BioLyt Aloe Vera is used, in order to ensure the calf a sufficient energy uptake. The calf can be fed with milk 1 hour after given BioLyt Aloe Vera. It is recommended that a vetenarian's opinion be sought before use.

Consumption:

3 kg are enough for approx. 50 allocations.
