

Great succes at EuroTier

We are overwhelmed by the genuine attention and curiosity new and existing business partners showed us in Hannover.

At our stand our sales team presented both well known best sellers and new product innovations.

The market has great interest in both natural growth enhancers and natural supplement feed, to reduce the use of medicals such as antibiotics.

Our customers especially appreciate the documented proof of effect our products due to continuously testing and trial making.

Learn more about our product innovations below.

Have confidence in us

Our products are quality approved throughout the production chain. We use GMP+ certification to ensure high quality standards for our raw materials, production processes and the finished product.

Products with better results

Our functional supplementary feed products are aimed at young animals and animals exposed to periodic stress. It creates results at the bottom line. We also offer a wide range of products for use in organic production.
